

Factory Visit: Hitachi Energy Lenzburg

45 years of power semiconductor excellence — from Swiss BBC heritage to the Silicon Carbide technology driving tomorrow's e-Mobility and grid.

Why you should join

- 1 Walk through one of Hitachi Energy's most advanced, automated power semiconductor site (Frontend and Backend for Si and SiC).
- 2 Learn how Lenzburg's semiconductors enable HVDC and grid stabilization worldwide and how they are making trains moving.
- 3 Discover a site rooted in 1981 (BBC), now shaping global electrification inside Hitachi and Hitachi Energy.
- 4 See where RoadPak™ SiC modules for EVs, e-buses and Formula E are made.

Your Day

Depart Interlaken Ost

07:29 — RE9 towards Spiez (via Bern & Olten)

Change in Spiez & Olten

07:54 Spiez	Track 3	IC 6 towards Basel
09:05 Olten	Track 9	S23 towards Baden

Arrive in Lenzburg

09:27 — short walk to site (10')

Guided Factory Tour

10:00 – 12:00

Return Journey

Depart Lenzburg after 12:00
